Symbol flowers	Azalea

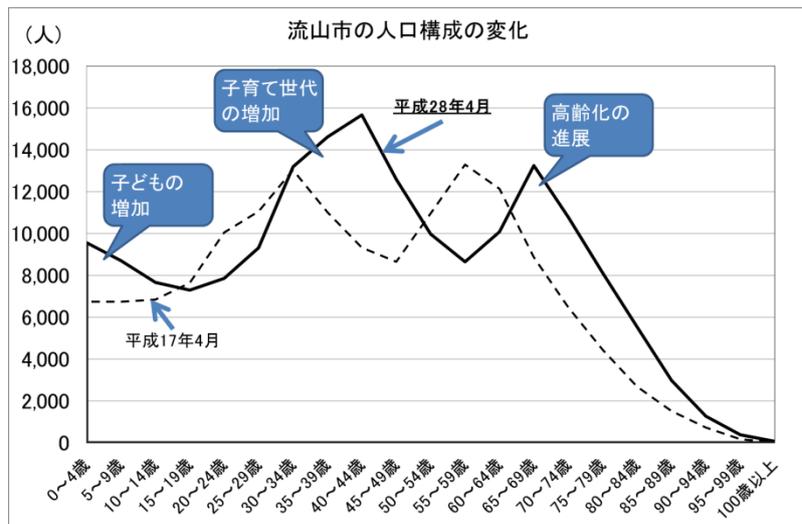

* Population, number of households June 1, 2016.

Nagareyama city is located in northwestern area of Chiba Prefecture. City's east part contacts with Kashiwa city, west part contacts with Misato City and Yoshikawa City of Saitama Prefecture separated by Edogawa River, south part contacts Matsudo City, and north part contacts Noda City separated by Toneung Canal. City is rich with nature, water, and green though the distance from central Tokyo is only 25 km.

In August, 2005, Tsukuba Express (TX) Line opened and it connects the city with Akihabara directly in 20 minutes. 640 hectares of land readjustment has been progressing in conjunction with TX, and together with marketing strategy target at families with small children, city's population is rapidly increasing.

On the other hand, due to the development, loss of green space is proceeding.

Such rapid change in urban environment is expected to influence factors of health; therefore, there is a need for lost green to be recovered. For this purpose, city

governments, public, private company and various organization cooperate to restore decreased green by "Green Chain Strategy" as well as "City Forest Project" which increase green making the city forest town closest to central Tokyo.

Health in All Policies

Healthy City Nagareyama

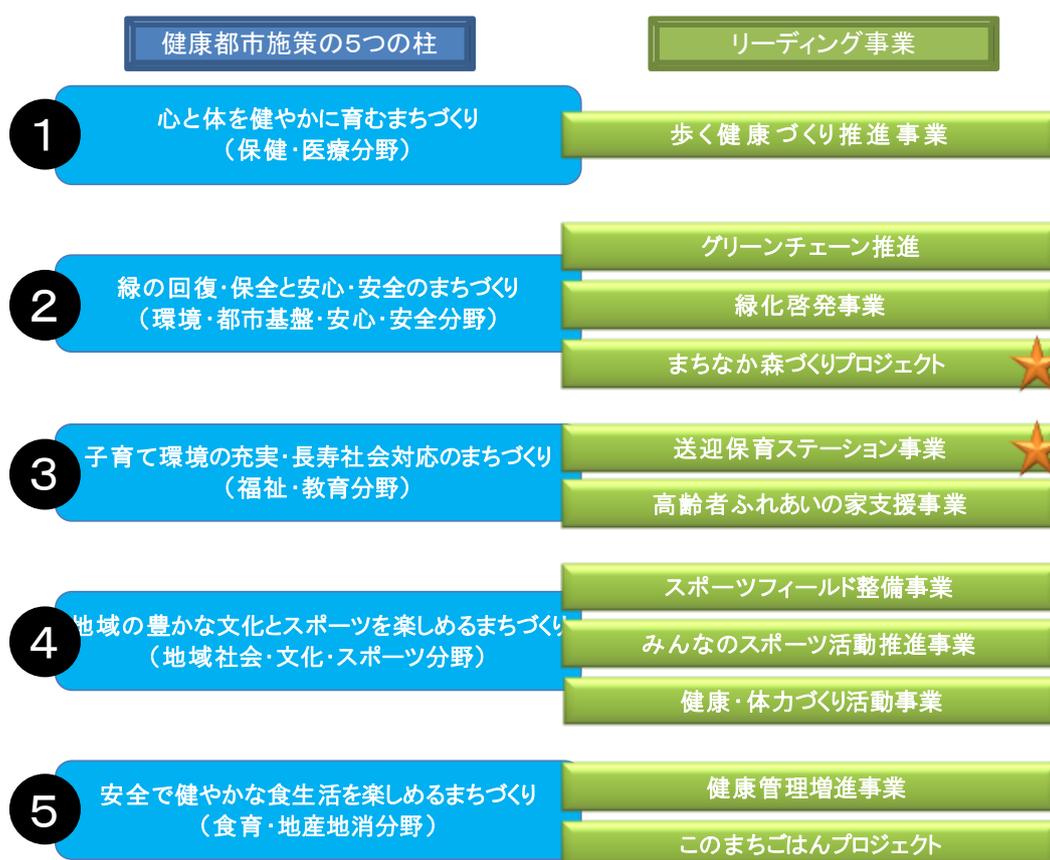

City made "Healthy City Declaration" on January 1, 2007, as a 40th designations commemorating anniversary project. In April, city joined the Alliance for Healthy Cities and Japan Chapter of the Alliance, promoting policies which is based on Healthy City philosophy advocated by WHO.

Nagareyama Healthy City Program

Its purpose is to promote Healthy City policy to make citizens' life healthy and affluent. Only health and medical fields are not enough for this purpose, so the city facilitates collaboration of ecology, city development, welfare, education, community, culture, sports, etc., in order to realize it by Healthy City Program.

In this program, every policies and projects are reorganized from perspective of health, and comprehensive approach has been taken.
